- position lights
- hardox knives
- 3-point-attachement, cat. II

optional equipment for extra charge:

- mounting plate
- hydraulic support wheels
- combi knives
- adjusted headstock
- flags

The particularity of the SL Vario:

Because of the steep cutting angle of 45° the snow gets lifted up and gets to the top. Thanks to the rollable blade the snow is accelerated and gets thrown away up to eight meters.

In addition, our vario model has an ever smoother notching system, as it consists of four parts.
