Jagoda one-sided auto weeding machine LUCY LU-01F

- Reduces your costs and your environmental impact.

Technical specifications:

- Attaching method Three-point linkage system. Front of the tractor or special bracket (depending on the tractor model, as an option)
- Drive Tractor's hydraulics
- Oil demand 30 l/min
- The diameter of the weeding head 300 mm
- Number of operators 1 (tractor's operator)
- Working speed about 3 km/h
- Transport speed 20 km/h
- Max working width 1700 mm
- Min working width 1100 mm
- Transport Width 2 200 mm
- Length 1 176 mm
- Height 1 157 mm
- Weight 180 kg

LUCY - hydraulically powered auto weeding machine is intended for destroying weeds in orchards of fruit trees, plantations of berry bushes vineyards, apples, apricots, blueberries, nuts orchards, cherries, figs, grapes, kumquat, lemon, lime, mulberry, olives, plums, papaws, orange, pears, persimmons, pomegranate and more other. Solution for inter-row and inter-plant weed control: The auto weeding machine with hydraulically adjustable width allows for use in crops with different row widths. Depending on the plantation conditions, the size of weeds or the hardness of the soil, the automatic weeder LUCY can be used with

heads that are equipped with different types of claws. The rotating working heads weed the strip of field between plants. Arriving at the trunk, they automatically move away from it, and after “moving around” the obstacle, return to the previous setting. This solution permits to avoid any risk of plant damage. The automatic weeding machine LUCY is controlled by means of an electric console located in the tractor cab. The automatic weeding machine LUCY allows reducing significantly or even eliminate the use of herbicides in fruit productions.

EXPORT: ONLY THE NET AMOUNT NEED TO PAID (with valid EU- VAT number)/ TRANSPORTATION WORLDWIDE POSSIBLE at good conditions. Offer valid while stocks last.
