Dodatkowe informacje:

Harvester Description

The **harvester** is designed for **apple harvesting** in orchards managed according to the requirements for **mechanical harvesting systems**.

The harvester's parameters are adapted for orchards where the **row spacing between trees is at least 3.5 meters.**

The machine is also suitable for harvesting **apples and pears intended for industrial processing.**

Standard Equipment:

- Independent **hydraulic system,**
- **Electric oil cooler,**
- **Double-tilting side sweeper,**
- **Levelling and tilting system** for the fruit pickup unit,
- **Levelling of the support axle** (left and right sides controlled separately),
- **Additional cleaning conveyor belt,**
- **Folding and hydraulically lifting conveyor belt** for transferring fruit to the adjacent row,
- **Hydraulic control valve block** for machine functions,
- **Hydraulically lifted pickup unit** for transport,
- **Stepless speed adjustment** of all conveyor belts.

Power Requirement:

Depending on configuration — **minimum 45 HP.**

Optional Equipment:

- **Air blower for removing remaining fruit from tree trunks into the adjacent row,**
- **Front-mounted sweeper for the tractor,**
- **End conveyor section with a flexible discharge chute.**

We offer nationwide transport. The price quoted is net.
