Dodatkowe informacje:	

Specification

The JUNIOR II fertilizer spreader is designed for even distribution of granular fertilizer over a specified working width. It is mounted on the tractor's three-point hydraulic lift system. The machine is equipped with two spreading discs. The structure is made of metal coated with durable paint, while the entire spreading mechanism (disc, blades, cover) is made of acid-resistant stainless steel. Hydraulic control is standard. Opening is operated by a hydraulic cylinder (right-left side) and includes road lighting.

Technical Specifications

Parameter	Value
Hopper capacity	600 kg / 800 kg / 1000 kg / 1200 kg
