SPECIFICATION

The JUNIOR II Plus fertilizer spreader is designed for the uniform distribution of a precise dose of granular fertilizer over a set working width. It is mounted on the tractor's three-point hydraulic hitch. This machine is equipped with two spreading discs. The structure is made of metal coated with

durable paint, while the bottom of the spreader and the entire spreading mechanism (disc, paddles, cover) are made of acid-resistant stainless steel. Standard features include hydraulic control / opening via actuator (right-left side) and road lighting.

Technical Specification

Parameter	Values
Hopper capacity	800 kg, 1200 kg, 1600 kg
Working width	12 m, 15 m, 18 m, 24 m
