### **SPECIFICATION**

The JUNIOR II Max fertilizer spreader is designed for uniform distribution of a precise dose of granular fertilizer over a set working width. It is mounted on the three-point hydraulic hitch of a tractor. The machine is equipped with two spreading discs. The structure is made of metal coated with durable

paint, while the bottom of the spreader and the entire spreading mechanism (disc, vanes, cover) are made of acid-resistant stainless steel. Standard features include hydraulic control / opening via actuator (right-left side) and road lighting.

## Technical specifications
