

STONE PICKER TUTKUN KAPLAN

working depth
until 35cm

power demand
starting at 50hp

The Kaplan series of stone pickers by Tutkun is a machine of unique construction designed for the collection of stones from the surface of cultivated fields. The stone collector can also be used to clear stones from other surfaces such as construction sites, beaches, turf production areas, sod, lawns, golf courses, sports and tourist facilities and many others.

We offer stone collectors with a hopper capacity from 4.5 to 8.5t and a working depth of 350mm. TUTKUN stone collectors are known for their high functionality, reliable operation and high performance.

The construction of the collector's back wall enables very effective separation of the collected stones from the soil.

Model	Kaplan 140	Kaplan 175	Kaplan 200
depth (max)		33-35cm	
length		520cm	
Transport width	225cm	255cm	280cm
height		255cm	
Working width	140cm	175cm	200cm
min-max diameter of collected stones		3-35cm	
hopper capacity	max. 4500 kg	max. 6000 kg	max. 8500 kg
power demand	50-65 hp	60-80 hp	80-90 hp
Weight of the machine	3180 kg	3555 kg	3850 kg
unloading height		210 cm
